Joe,

Looks like we are OK. Guy LaVigna sent documents to our permitting group, not Enforcement. Enforcement just received them today from permitting. If I have any questions I'll let you know.

Talk to you soon...

Morning Joe,

Just reaching out to touch base regarding the VOC emission factor EPA was going to provide for Parkway Iron. Hoping you can get this to me in the near future.

Thank you for your time and help.

11/1/2021
Hi Joe,

I'm writing to follow up on our telephone conversation on 9/23/2021 regarding Parkway Iron & metal. I had been under the impression at the conclusion of the phone call that EPA R2 was going to send me emissions information (VOC) regarding this facility, from the Section 114 letter sent to the facility. If you could forward this information it would be helpful in the evaluation of the facility's compliance status and preparation for an inspection of the facility.

As an aside, my schedule in the office is currently intermittent so if you need to reach me it may take me a little longer to get back to you. You can also contact my supervisor, Hiram Oser, if you need more immediate contact.

Talk to you soon, thank you for your time and assistance in this matter.

Hi Joe,

I'm writing to ask for information EPA has regarding Parkway Iron & Metal (NJDEP PI#31125) in Clifton, NJ, based upon the email string below. In specific NJDEP is interested in:

- TSP emissions and calculations
- VOC emissions and calculations
- HAP emissions and calculations, as well as speciated HAPs and how they were identified at this site
- production data exceeding permit and associated dates
- a copy of the enforcement action in 2016 that EPA processed for reference

Please let me know if you have any questions or need to discuss further.
Thank you for your help and assistance in this matter.

Regards,

Philip Savoie

Needed from EPA

- TSP emissions
- VOC calculations , currently permit reflects no VOC emissions.

Hiram – please feel free to reach out to Joe Cardille of EPA. Let's try to make this order as complete as possible.

Please see the attached. EPA is investigating and has referred to us. The source is suspected of high VOC emissions. The permit lists only particulate. Mark last inspected in 2016. EPA has taken enforcement action in 2016 and the source appears to have installed controls without a permit. EPA also has emissions data showing HAPs not listed in the permit as well as production data exceeding permit as well. Please assign to Phil. Do not issue any documents without my approval first.
